

CSP-1 S-Press Handles

The CSP-1 S-Press is supplied with the CSP-1SH standard handle, which has an effective leverage of 18.5 inches (comprised of angled 11 and 9 inch sections). For additional leverage, Corbin makes the CSP-1LH long handle. This is optional and is most commonly used for CTJM-1-S tubing jacket maker sets which use 1/2 inch tubing. The CSP-1LH has an effective leverage of 25.5 inches (comprised of angled 18.5 x 9 inch sections).

Either handle attaches to the left or the right side of the press toggle, using a hardened key and hex nut.
